RE: *Boullion King Mine Reclamation Project, File No. M-2019-011 , 110(2) Application Adequacy Review*

Dear Mr. Humphries:

The Division of Reclamation, Mining and Safety (Division) is in the process of reviewing the above referenced application in order to ensure that it adequately satisfies the requirements of the Colorado Mined Land Reclamation Act (Act) and the associated Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal, and Designated Mining Operations (Rules). During review of the material submitted, the Division determined that the following issue(s) of concern shall be adequately addressed before the application can be considered for approval.

1. Pursuant to Rule 6.3.5(2)(a), outline and label the entire permit boundary on a Mine Plan Map.
2. The two existing ponds will be filled in during reclamation. The mine water discharge pipe should be cut down and plugged with cement grout or similar material prior to backfilling the pond. Please state the operator's plan to plug the mine water discharge pipe.
3. The reclamation plan states that the two mine shafts have been secured. Please describe, in detail, how the shafts have been secured.
4. The reclamation plan states that the shaft adjacent to Anthracite Creek will be further buried. Please describe, in detail, measures to be taken to further secure the shaft.

Please submit your response(s) to the above listed issue(s) by Friday, March 22, 2019 in order to allow the Division sufficient time for review.

The Division will continue to review your application and will contact you if additional information is needed.

If you require additional information, or have questions or concerns, please contact me.

Sincerely,

Dustin Czapla
Environmental Protection Specialist
