Hello Kurt,

The work looks great, I understand what a challenge it was to do that work with limited access and space. Thank you for your attention to this matter. I will consider the corrective action from the December 20, 2017 inspection report abated. I will be out in Adams County next month, I will coordinate with you to come out and take a look on-site.

Thanks again,

Jared

Jared,

I am delighted to notify you that we have completed the bank stabilization as required by the Division. Please see attached memo and photo documentation for additional details. Also, please let me know if you require any additional documentation.

We have a contractor ready to seed the affected areas next week if the soil conditions are amenable.

Thanks again for your guidance, support and patients while working with us. Although the project was a bit tricky, the end result was outstanding and our golf course staff really liked the final outcome. If you need any of the original photos for your files let me know as well and I can provide those to you.

Sincerely,

Kurt Carlson, MAS

Subject: Re: Debetz Pit Schedule - M-1977-283

The Division will extend the corrective action cited in the December 20th, 2017 inspection report to March 29, 2019. Please let me know if you have any other questions.

Thanks,

Jared

Jared,

I would like to formally ask for another 90-days to complete the Debetz Pit project as this will help keep costs down when bidding the project and will also allow us to mitigate impacts to the golf course during construction. We will have the embankments repaired by the end of Feb and will re-seed the impacted areas in late Feb. - early March of 2019 depending on weather and soil conditions.
