Darryl,

This email is to follow up on our earlier phone conversation about the status of a parcel of land situated within the Bear Mine permit boundary.

You can access the full archive of documents relating to the Bear Mine, by following the links from our website (<http://mining.state.co.us/>). Go to "Reports & Data", and select "Imaged Document Data", then "Click here to search by permit number". As you know, the permit number for the Bear Mine is C-1981-033, but you should type it in without the hyphens, so "c1981033". There are 154 pages with 20 documents on each. You can use any of the other search fields to limit your results, or you can click on the column headers to sort the results by that field (e.g. click on "Doc Date" to get the results in chronological order).

I have downloaded and attached three memos from the archive that might be relevant for you. I have also included links to four recent inspection reports that document the reclamation work that took place in late 2016, as well as some fire risk mitigation work the Division carried out in 2017. Finally, I have also included links to some pictures of the vents that I took with a drone in December 2017.

Hope this is helpful for you. Please call or email if you have any further questions.

Leigh Simmons
