Amy,

I got all the pit markers moved to the coordinates on your attachment, and also put 80" tall, 3" PVC pipe on all 4 of them. I'm hoping it will prevent cattle from rubbing on them, also, they are much more visible. Thank you for your help and patience with us. Have a good day.

Jason

Amy,

I forgot to mention that I did not move the NE marker, left it on the coordinate on map, just pushed it in more, and put the pvc on it.

Jason

Amy,

This is Jason Freibeger, we spoke on the phone while I had bad service in Aurora. I'm sorry it has taken so long to get these pictures sent to you, a lot has come up since we talked, I definitely wasn't putting you off. Thank you for your help in this matter, and look forward to hearing back from you so we can get these markers set in the correct spot. Thank you again, and have a great day.

Jason

Hi Jason,

I appreciate you getting these coordinates and pics to me. I plotted them in Google Earth and found the marked permit area to be 109 acres, the western boundary is not quite straight, and the southern boundary sort of overlaps the topsoil pile (which is not good). To get the boundary marked correctly, it looks like you could move your NW corner marker due west 392 feet, and your SW corner marker 505 feet due south then 500 feet due west.

I'm attaching a Google Earth map showing the approved permit area compared to the permit area as delineated by the existing markers. The coordinates are on there too so you could use them as a guide when resetting your NW and SW markers.

Hope this helps!

Thanks,

Amy Eschberger

Amy,

That helps a lot, and will get them moved, repainted and new pictures sent as soon as possible, (hopefully Monday). We knew when we found them, they had to be wrong. Thank you very much.

Jason

Jason,

Please disregard the map I just sent because I just got your SE corner coordinates and plotted them in Google Earth too. The south boundary as marked by your existing markers is pretty whacky. Take a look - I'm attaching a revised map with all your coordinates now, and the marked permit area comes out to 100 acres (60 acres less than the approved 160 acres).

Thanks,

Hey no problem Jason. Take a look at the revised map I just sent with your SE coordinates added.

Thanks,
