Eric,  
The Town of Kersey received notice of the above application. This site is located within the Town of Kersey Planning Area and adjacent to WCR49 which is included in the Kersey Town limits. The property is also located within the Kersey, Evans and Greeley Cooperative Planning Area.  
Per the Weld County Property Search web site, a significant portion of the property lies within a designated floodway. It appears that there are planned stockpiles and processing equipment located in the flood way. Has the applicant accounted for this in the permit documents?  
The Town does not have any additional comments at this time. Please keep us informed as the application proceeds through the review process and let us now when you issue your adequacy review and receive updated documents from the applicant so that we can continue to monitor the application.  
The Town of Kersey reserves the right to comment on new and updated information as the application proceeds through the DRMS review process. Thank you for your consideration.  
Barb
