Interoffice Memorandum

June 25, 2019

From: Leigh Simmons
To: File

Subject: West Elk Mine (Permit No. C-1980-007)
MR-435

MR-435 revises the positions of holes SS1-1 through SS1-7, and eliminates holes SS1-8 through SS1-11. Associated pads and roads are revised accordingly.

The changes to the planned operations made with MR-435 result in a reduction of planned disturbance from that already approved and bonded for, however the operator did not submit a Bond Reduction Technical Revision, so the cost estimate will not be updated.

(The site-wide cost estimate is currently being re-calculated with RN-07)
