Re: TR No. 05 Extension Request, for Pueblo East (M1986-015) from July 26, 2019 to August 26, 2019

Continental Materials Corp. submitted a TR to modify the Ground Water Monitoring Program for the Pueblo East Pit, File No. M1986-015. In your adequacy response, the items numbered two through 5 and number seven, will take some time to obtain the information. The individual responsible for monitoring the site is no longer with the company. In addition, his duties were assigned to another person. That person is recovering from an operation and will not be back to work for a bit. I will attempt to get the information as soon as possible and address your questions.

We appreciate the DRMS granting the additional time.

Respectfully,

H. Bruce Humphries
