Re: TR Extension Request, for Pueblo West (M1977-573) from July 15, 2019 to July 31, 2019

Continental Materials Corp. submitted a TR to modify the Reclamation Plan for the Pueblo West Pit, File No. M1977-573. Part of the modification to the Reclamation Plan was to address the Finger Lake Area. This Area is owned by the Colorado Division of Parks and Wildlife (CDPW). We have not yet been able to schedule a site visit or get a written response from the CDPW. They requested a site visit, once the site was in Spring/Summer growth, so they could see if any remedial reclamation activities are needed.

Once they inspect the Finger Lake Area and we have their comments or response, we will be able to decide if the Finger Lake Area may be released or if it needs further attention. We will then revise the reclamation plan TR to address the Finger Lake Area and the rest of the site.

In addition, if work is needed on the Finger Lake Area, we may need an access agreement to enter the site and perform any necessary remedial reclamation. We assume the DRMS may want to have the access agreement as part of the TR?

Respectfully,

H. Bruce Humphries
