Mr. Ebert,

Please find the attached quarterly groundwater level report for Brannan's Pit 29 M-1980-183 facility.

Let me know if there are any questions.

Joshua Oliver

Re: M-1980-183 Quarterly Groundwater Monitoring Results Submission

Mr. Ebert,

Attached is the quarterly groundwater level monitoring for Brannan Sand and Gravel Company's Pit 29 facility for 2nd quarter 2019.

MW-4 continues to exhibit that the French drain remains functional in keeping the hydrologic balance in line with historic levels. There have not been any offsite impacts associated with hydrologic balance issues observed since the construction of the French drain.

MW-1 remains somewhat higher than in months past at around 15.5 ft. bgs, rather than around 20 ft. bgs. The level did go down toward the end of the quarter. There are no known offsite impacts at this time and this well will continue to be monitored. MW-2 groundwater elevations remain within normal ranges.

Please let me know if there are any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Josh Oliver", with a stylized flourish at the end.
