

Washington County Road and Bridge

District #3

Reclamation Plan 7Y Ranch Pit #1

We began earthwork on the 7Y pit on 7/23/2019.

We smoothed up the surface of the affected area and then began distribution of the topsoil.

We finished applying topsoil 8/5/2019.

I have attached pictures of the pit area taken after we finished the application of the topsoil.

The topsoil pile is used and the ground prepared for seeding.

The requirements set in the original permitting process call for a sorghum cover crop.

We are going to drill a cover crop the week of 8/9/2016.

We will drill the grass seed in September of 2019.
