Good Morning Jared

Thank you for looking at my pit and giving me an idea of where i was at on the reclamation

I am attaching this letter asking the board for more time.

Sorry Im so late getting you this letter. I have been working long hours this summer.

to keep money coming in so we can continue doing our reclamation work.

Thank you

Jared

Dear DRMS Board

I have made a lot of progress in reclaiming mined areas at my gravel pit. It was not enough to meet the required amount of my current bond. So I would like to ask the board for more time to do more reclamation. There are more slopes that I can grade and some more seeding that I can do to reduce this cost. I have also talked with the water board and meeting with Jeff Montoya of the Water division in our area to get the proper permitting for any water exposed at my pit. With a little more time I am sure I can reduce the cost of the reclamation to meet or exceed the bond amount. I think with 60 to 90 days I can reclaim most of the affected areas and have them seeded this fall so they will be growing by this spring.

I thank you for this opportunity Jared has been of great help of letting me know what needs to be done and showing me some of the costs associated with reclamation.

Thank you

Sincerely

Dan Robinson
