**Re: Grisenti Farms Gravel Pit, Permit No. M-2001-005;
Notice of Incompleteness, Technical Revision No. 4 (TR-04)**

Mr. Ainsworth:

On June 26, 2019, the Division of Reclamation, Mining and Safety (DRMS) received a Technical Revision application (TR-4) from Bruce Humphries (RPM, Inc.) and the required fee for the Grisenti Farms Gravel Pit Permit M-2001-005. The revision requested addresses the following items:

Request to install a small island in Pond 2 to enhance wildlife habitat

A file review of this permit determined the DRMS does not have current contact information and no official address for which to send correspondence. For this reason, we have deemed this TR request incomplete. The following name and address information must be received before the DRMS can consider the application as being submitted/filed and the technical review can begin:

- a. Permittee/Operator Contact: DRMS Records indicate this is Andre Laroche, whom has sent us notification he no longer is employed by Continental Materials Corp.
- b. Inspection Contact: Listed as B.J. Fuller in the 2019 DRMS Annual Report at 444 E. Costilla, Colorado Springs, CO 80903. The DRMS has had mail sent here returned as undeliverable.
- c. Permitting Contact: Listed as B.J. Fuller in the 2019 DRMS Annual Report at 444 E. Costilla, Colorado Springs, CO 80903. The DRMS has had mail sent here returned as undeliverable.

Please respond to this Incompleteness Notice with the requested additional/updated information by August 5, 2019. If, by August 5th, this information has not been provided to the DRMS, the DRMS may deny the TR application and terminate the request.

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist
