Re: Description of the current operations of the Colorado Alabaster, Permit No M1989077

Dear Sir or Madam,

We plan to schedule our quarrying in September or early October 2019. Activity will be in the area of B, D and E of our Reclamation Plan Map. We will begin by removing the protective backfill we applied last year to keep the alabaster from damage by weather. We will then dig fresh stone from the deposit for use this year. Then we will haul the stone to our yard in Fort Collins. When we have a sufficient supply we will replace the protective backfill over the deposit of alabaster.

Respectfully submitted,

Stanley C Jones  
Colorado Alabaster Supply
