Tabetha,

I am processing the SL-1 partial phase I bond release application for the Elk Creek Mine. The site-wide reclamation cost estimate is going to be updated with SL-1, and I would appreciate your help.

I have begun the process by compiling the list of tasks into a google sheet and identifying those that need to be changed, and those where the task can remain as-is (but the unit costs need to be updated).

https://docs.google.com/spreadsheets/d/1a5KJ-3eEJOo4mfedVoEY_GJ24Q9_hlgMQp_dAbw58A8/edit?usp=sharing

Georeferenced maps, including a map showing the SL-1 parcels, are saved at V:\GIS_Data\CoalGIS\DRMS

Georeferenced Scanned Maps\Elk Creek C1981022

All other materials relating to the application should be easy to find in laserfiche

The reclaimed stream channel has been carved out of the original parcels which changes the acreage that will be used for the bond release calculation, but shouldn't impact the tasks that are to be changed. I would like to create a new task for stream channel maintenance which can be left until final bond release.

I'm available to meet if you'd like to discuss it further.
