**Re: Project, Permit No. M-1980-244;
Technical Revision (TR-116) Second Adequacy Review**

Dear Mr. Schaffner:

On September 13, 2019 the Division of Reclamation, Mining and Safety (DRMS) received via email your responses to our September 5, 2019 Preliminary Adequacy Review (PAR) letter for Technical Revision (TR-116) addressing the following:

Underground Exploration

The decision date for TR-116 is currently September 18, 2019. Please be advised that if you are unable to satisfactorily address any concerns identified in this review before the decision date, **it will be your responsibility to request an extension of the review period.** If there are outstanding issues that have not been adequately addressed prior to the end of the review period, and no extension has been requested, the Division may deny this Technical Revision.

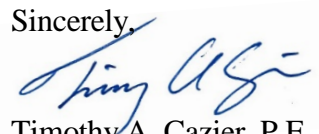

The following comments are based on the Division's review of CC&V's responses to the Division's PAR:

- 1) Figures and Maps: The response was adequate.
- 2) Table 1: The response was adequate.
- 3) Five support buildings: The PAR requested dimensions of the buildings, which would typically include building height. Only length and width were provided. Our demolition costs are based on building volumes. Please provide building height information.
- 4) Fuel Island Facility: The response was adequate. **The DRMS accepts CC&V's commitment to "submit additional information similar to that submitted with TR-63 as an addendum to this TR once the fuel island design is complete."**
- 5) Implementation Schedule: The response was adequate.

If you have any questions or need further information, please contact me at (303)866-3567 x8169.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim A. Cazier", is written over a light blue rectangular background.
