RE: DRMS Annual Report - Carr Gravel Resource, Permit M-1988-048
Anniversary Date: September 22

Dear Division:

L.G. Everist, Inc. respectfully submits this cover letter and map to accompany the online submittal of the DRMS Annual Report for Carr Gravel Resource, DRMS Permit # M-1988-048. The annual fee has been paid online with a credit card.

Within this reporting year, L.G. Everist completed the reclamation in part of the Carr Gravel Resource permit area. The fully reclaimed area is located in the southern half of Section 35, and had achieved substantial and sustainable grass growth, so we requested an acreage release. On July 3, 2019, the DRMS approved our acreage release request of 273 acres, which reduced the permit area to 521 acres. The attached **Exhibit C1 - Mining Plan Map (Jul-2019)** has been updated to reflect the new permit boundary.

The remaining permit area is south-east of the Town of Carr, located in parts of Section 1, Township 10 North, Range 67 West, 6th P.M., Weld County. The current mining area, plant site area, and bone yard (equipment storage) area are shown on the attached Mining Plan Map. A narrow portion along the north edge of the mining area (about 2 acres), has been topsoiled and seeded since last year - the grass is slowly growing.   There was no mining or processing of new material this year, but some finished product was used and sold from existing stockpiles. The permit area is inspected regularly, as required for safety, stormwater, and weed management. We control weeds as needed throughout the year(s) with spraying and mowing.

If you have questions, please feel free to contact me at 303-286-2247, or lmshults@lgeverist.com.

Sincerely,

Lynn Mayer Shults
Regulatory Manager
