Subject: Bowie No. 2 TR-121 adequacy review

Leigh,

I am requesting your review of TR-121, which proposes a reduction in the frequency of groundwater monitoring at Bowie No. 2. This effort could be (possibly should be) combined with a review of the groundwater portion of the 2018 AHR for this mine, and possibly the groundwater portion of the North Fork CHIA.

I am happy to discuss this if you find it beneficial.

Thanks,
Rob
