

Interoffice Memorandum

To: Clayton Wein
From: Rob Zuber *RZ*
Date: October 4, 2019

Subject: Deserado TR72 SEDCAD and water quality compliance review, Third Adequacy

I have reviewed the adequacy response from Blue Mountain Energy (received October 4, 2019). The operator has addressed all of my concerns for the design related to this TR.

As we discussed, verifying that the spillways and riprap channels are functioning will be ongoing inspection items as these structures are built.
