RE: May Day Idaho Mine Complex, File No. M-1981-185 , Technical Revision (TR-09) Application Adequacy Review

Dear Mrs. Glinatsis:

The Division of Reclamation, Mining and Safety (Division) is in the process of reviewing the above referenced application in order to ensure that it adequately satisfies the requirements of the Colorado Mined Land Reclamation Act (Act) and the associated Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal, and Designated Mining Operations (Rules). During review of the material submitted, the Division determined that the following issue(s) of concern shall be adequately addressed before the application can be considered for approval.

1. In the "Introduction" section of the Technical Revision it is stated that the removal action was discussed with the US Army Corps of Engineers (USCOE), La Plata County and the Division. Documentation was included from the USACOE however none was included to demonstrate compliance with La Plata County. Please provide written documentation of approval from La Plata County authorizing the work proposed under this Technical Revision.
2. In the "River Crossing" section of the Technical Revision it is stated that fallen logs across the access road to the crossing will be removed and stored in existing log piles within the permit area. Please commit to replacing the downed tree to its current location to serve as a deterrent to the future use of the low water crossing. Please also note that, if approved, this Technical Revision will authorize the one time use of the low water crossing and under no circumstances shall this be interpreted as authorization for its continued use.

Please submit your response(s) to the above listed issue(s) by Wednesday, October 30, 2019 in order to allow the Division sufficient time for review. If more time is required to address the above listed issues please submit a Decision Date Extension request, in writing, to the Division prior to the Technical Revision Decision Date of Monday November 4, 2019. If no response is received by the Decision Date your Technical Revision may be denied.

The Division will continue to review your application and will contact you if additional information is needed. If you require additional information, or have questions or concerns, please contact me at the Division's Grand Junction Field Office.

Sincerely,

Lucas West
Environmental Protection Specialist
Division of Reclamation, Mining and Safety
