**RE: Receipt of Corrective Action Documentation
Detroit City Mine, Permit File No. M-2017-003**

Dear Mr. Lees,

On October 16, 2019, the Division of Reclamation, Mining and Safety (Division/DRMS) received your corrective action documentation regarding Compliance Problem #4 identified in the September 20, 2019 report for the August 29, 2019 inspection of the Detroit City Mine. The corrective action documentation shows straw wattles have been placed at the toe of the waste rock pad to control off-site sedimentation. Given this, Compliance Problem #4 has been abated. The Operator should reevaluate this area during the spring to determine if additional erosion control measures are needed.

If you need additional information or have any questions, please contact me at Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at **303-866-3567 x8132**, or by email at elliott.russell@state.co.us.

Sincerely,

Elliott R. Russell
Environmental Protection Specialist
