**Supplemental Information:  
File No. M1977-376  
Canon Dolomite Quarry  
2019 Annual Report**

- Question 14: We have a weed control program. No noxious weeds were identified for treatment this year.
- Question 15: Crusher fines are to be used as plant growth material. Therefore, no topsoil was salvaged when the Quarry was opened or during on-going operations.
- Questions 6 and 7: The present use of the Quarry is for landscape rock as approved in a previous permit revision. Demand is low and occurs during the Spring and Fall landscape season.
- Question 16: Since there are no topsoil stockpiles on site, there are none to seed.

Respectfully,

H. Bruce Humphries
