RE: State Pit, M1990-112

Mr. Lennberg,

This letter is to address the Minerals Reclamation Permit Annual Report for this site and the citizen complaint that noted a discrepancy in the reported acreage. Fremont Paving and Redi Mix, Inc. would like to update the acreage accounting and revise questions #8 through #13 of the report to show current conditions.

#8 – 226 Acres are currently affected

#9 – 20 Number of acres that were newly affected during the current report year

#10 – 20 Number of acres that were reclaimed during the current report year

#11 – 20 Estimated new acreage to be affected in the next report year

#12 – 20 Estimated acres to be reclaimed in the next report year.

#13 – 70 Total acres backfilled/graded/seeded

The seed application method was drill seeding with 70 acres topsoil replaced at a depth of 6 inches. 70 acres were mulched at an application rate of 1.0 tons/acre and was crimped in with a tractor.

Fremont anticipates seeking release of the 70 acres with the remaining acres being re-evaluated in the spring of next year.

Sincerely,

Jodi Schreiber
Chief of Operations
