RE: Golden Wonder Mine - Request for extension of time to implement corrective actions.

Dear Ms. Mitchell,

The purpose of this letter is to request additional time to implement the corrective actions requested in your last property inspection report dated Oct. 3, 2019.

As you know, the Golden Wonder is located at an elevation of nearly 10,000 feet. By the time we rec'd your inspection report there was little time to discuss the problem with the engineers who designed the treatment system and then engage a contractor to make the required improvements before freezing temperatures made working with the drainage treatment system very problematic.

Accordingly, we respectfully request that you grant us an extension of time to implement your corrective actions. We estimate that the snow will be off the ground by mid May when we'll inspect the site and devise a plan. After that, it will take at least 30-40 days to engage a contractor and do the work. We estimate that we can have the work completed and ready for inspection by no later than July 15, 2020.

Respectfully submitted,

Kye Abraham
President
