

Environmental Protection Facility Certification

Climax Mine – Permit No. M-1977-493

Technical Revision 29

Interceptor Improvement Project – Phase D

The Interceptor Improvement Project – Phase D was approved as Technical Revision No. 29 to Mine Permit No. M-1977-493 on March 26, 2019. This project is located at Climax Molybdenum Company's Climax Mine in Summit County. The project involved the replacement of an approximately 3,800-foot section of an existing pipeline used to convey fresh water from Searle Creek around the mine impacted areas. The undersigned was responsible for the design of the pipeline and appurtenant structures.

The contractor has substantially completed the construction of the project and it has been tested and determined to be functional. Record Drawings of the project are attached.

Pursuant to Rule 7.3.2, the Professional Engineer that has signed and sealed below certifies that the project was completed in general conformance with the approved design as submitted to the Division of Reclamation, Mining, and Safety. This statement is based in part on information that has been provided by others.
