**RE: Gold Hill Mill Permit No. M-1994-117: Weed Control Management Plan Report**

Amy Eschberger:

Attached to this letter is a copy of a map of the Gold Hill Millsite, showing all of the areas within and near the permit boundaries that were sprayed for weeds during the past year. On May 1 and July 25, 2019, a CMC employee spent a total of 12 man hours spraying for weeds at the Gold Hill Millsite. The area around the tailings impoundment dam and the property South and West of the mill building were sprayed with 14 gallons of herbicides. Roundup and Curtail are the brand names of the two herbicides sprayed on the weed infestations. Canadian thistle and Spotted / Diffuse knapweed were the main weeds that were sprayed for during this time period.

Canadian thistle & Knapweed / GHM / 5 acres of Infestation. / Spring / Summer / Spraying / High Priority.

Canadian thistle & Knapweed / GHM / Thin to Dense depending on location. / Very Vigorous in certain areas and thinner in most other areas depending upon cover. / 12 Hours were spent with 1 man spraying for a total of 12 man hours.

The weed management spraying that was completed in 2018 appears to have been successful, except that the Cattails inside the tailings pond were not abated by the spraying conducted in this area.
