RE: Table Mountain Quarry, Permit No. M-1999-004
Technical Revision 2
Adequacy Review #1

Dear Mr. DiLuzio,

The Division of Reclamation Mining and Safety (Division) has reviewed your application for Technical Revision 2 (TR-2) for the Table Mountain Quarry, M-1999-004. The Division has the following comments/questions regarding the application;

1. Exhibit L demonstrates that the required backfill for the 40' X 2,000' highwall graded to a 3.5h:1v slope to be 207,407 cubic yards of fill. This volume includes both backfill and topsoil. It is unclear in the TR-2 application (and current permit) where this volume of backfill and topsoil are stored/located within the approved affected area. This information is needed to complete the cost estimate of hauling material. Please clarify topsoil stockpile locations and the source/location of the backfill material on a map.

Please note that the decision date for the TR-2 application is February 20, 2020. If you are unable to provide satisfactory responses to any inadequacies prior to this date, it will be your responsibility to request an extension of time to allow for continued review of this application.

If you have any questions, please contact me at (303) 866-3567 ext. 8142 or brock.bowles@state.co.us.

Sincerely,

Brock Bowles
Environmental Protection Specialist
