***RE: Skull Creek , File No.M-2019-054, Contruction Material Regular (112) Operation Reclamation
Permit Application, Incorrect Publication Information***

Dear Mr. Johnson:

On January 17, 2020, the Division of Reclamation, Mining and Safety (Division) received a digital copy of your newspaper publication which was found to be in error. The following items were found to be incorrect;

1. The post mining land use was not stated in the publication
2. The publication was only run once in the Craig Press on January 22, 2020. This type of permit requires public notice to run for 4 consecutive weeks.

Rule 1.6.6 states when an error in notice occurs that the applicant shall be required to publish and mail new notice of application and that all applicable deadlines shall begin anew. Therefore, you must re-publish the permit application notice with the correct post mining land use as identified above. Please also correct the public comment period end date which will be not more than ten (20) days after the publication date.

Currently the decision due date is set for April 14, 2020. Due to the need for re-publication the operator may find this deadline challenging. If additional time is necessary, you may request an extension prior to the decision due date which is recommended. If you require additional information, or have questions or concerns, please contact me at the Division's Grand Junction Field Office, by phone at 303.866.3567 ext 8180 or by email at stephanie.mitchell@state.co.us.

Sincerely,

Stephanie Mitchell
Environmental Protection Specialist
