RE: TALLAHASSEE PIT M-1999-003 TR EXTENSION REQUEST

Dear Mr. Cazier,

Due to rough ground conditions at the Tallahassee Pit site these past couple of months, I have not been able to schedule a site visit and attend to the realignment of boundary markers that define the 9.9 permitted area. Please consider this request for extension of due date for corrective action via technical revision for permit M-1999-003. With the lessening snow cover, I plan on visiting the site this week and should have an application for technical revision prepared for filing within the next two weeks. I would appreciate your consideration of a 30 day extension of due date for filing the TR. Thank you.

Regards,

Kenneth S. Klco, Consulting Geologist
