**Re: Terror Creek Loadout (C-1983-059)
Annual Hydrology Report, 2019**

Dear Mr. Smith,

The Division has reviewed the 2019 Annual Hydrology Report (AHR) for the Terror Creek Loadout.

The report was received by the Division on January 9, 2020, and satisfies the requirements of Rule 4.05.13(4) and of section 2.05 of the Permit Application Packet (PAP).

No groundwater monitoring is required. With respect to surface water monitoring, neither of the two ponds on the site discharged water during the reporting period, therefore no monitoring data was included in the report. The ponds were inspected quarterly.

The Division does not require ongoing monitoring at any of the SAE sampling points.

Sincerely,

Leigh Simmons
Environmental Protection Specialist
