RE: Adequacy Review No. 4; Technical Revision (TR-06); Pueblo East Pit, Permit No. M-2000-041

Dear Ms. Schreiber,

On February 13, 2020, the Division of Reclamation, Mining and Safety (Division) received a request for Technical Revision (TR-06) to extend Phase II mining into Phase III and decrease the size of Phase III to be north of the 100-year floodplain at the Pueblo East Pit, Permit No. M-2000-041. On May 27, 2020 the Division received your responses to the Adequacy Review No. 3 dated May 13, 2020. An extension to the decision date was approved on May 7, 2020 that revised the decision date to June 11, 2020. Please be advised that on June 11, 2020, the application for TR-06 may be deemed inadequate and denied unless the following adequacy items are addressed to the Division's satisfaction. Subsequent to receipt and review of the Operator's response to these items. Please respond to the adequacy items with a letter summarizing each response, to the numbered items below, in a cover letter titled "Adequacy Review No. 4 Response TR-06, M-2000-041".

1. Please label the current conditions map.
2. On the current conditions map please include the location of the well owned by Mark Morely (well ID number 277288).
3. Please provide a brief narrative of how mining will be completed near the well, will a buffer be left in place to insure access to well?
4. The reclamation map provided shows the reclamation to be Open Range/Agriculture Lands which is inconsistent with what has been stated in previous correspondence. Please indicate the interim reclamation to be open space and final reclamation to be wetland and water storage as appropriate.

This concludes the Division's adequacy review no. 4 of your application. The Division reserves the right to further supplement this document with additional adequacy items and/or details as necessary.

The decision date for your application is set for June 11, 2020. However, please allow the Division sufficient time to complete its review by submitting your response in a timely manner prior to the decision date. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied and the file terminated.

If you need additional information or have any questions, please contact me at Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, CO 80203, by telephone at **303-866-3567 x8114**, or by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
