Subject: #M1980013, Elk Horn Springs Pit

We would like to show that the Elk Horn Springs pit is in final state of reclamation as of 05/15/2020, just waiting for grass to grow. We used:

1: 100 lbs. Hayman seed mix

2: 1550 lbs. fertilizer

3: 4470 lbs. Mulch

We used hydro seeder to mix all together and to spray mixture.

Good morning

Sorry for the delayed response as I am out of the office a lot at this time of year.

The Hayman mix contains:

22% Mountain Brome, *Bromus marginatus*

22% Canada Wildrye, *Elymus canadensis*

16% Little Bluestem, *Schizachyrium scoparium*

14% Blue Grama, *Bouteloua gracilis*

14% Arizona Fescue, *Festuca arizonica*

12% Slender Wheatgrass, *Elymus trachycaulus*

If you need any other information, please let me know.

Thanks

Alex Tonnesen
