Hi Patrick

As discussed today, GCC Pueblo is still under COVID-19 protocol to only allow essential employees/vendors onsite at least through the end of July (for example, I'm at the facility 1-2 times per week, as needed and continue to work from home the rest of the time). GCC leadership has indicated that they will re-assess this policy again in August. As such and based on our previous discussions, the groundwater monitoring will continue to be postponed and is likely to be performed in September 2020. I'll continue to provide status updates on our operational status as well as groundwater monitoring. Please let me know if I misunderstood anything or if you have any questions or comments.

Thanks,

**DIANA FURMAN**
