Hello Amy,

Please see below, we have informed CDPHE (Jacob Dyste) that we have passed two consecutive accelerated WET tests. No pattern of toxicity has been identified and we will resume normal testing.

Regards,

Billy

Hi Jacob,

As you recall in May 2020 the water treatment plant at the Schwartzwalder Mine failed a WET test for the fathead minnow test species. In response to this result, and in accordance with our discharge permit (CO-0001244), we conducted accelerated WET testing in June 2020. This email serves as written notification of the passed accelerated WET testing. The sample results for the initial failed WET test, and the two consecutive passed WET tests are attached. No pattern of toxicity has been identified, therefore we will resume routine testing.

If you have any additional questions regarding these results please contact me directly.

Regards,

Billy

Subject: Schwartzwalder Mine WET

Hi Billy,

Eric Mink is transitioning his WET compliance over to me. He forwarded me your previous email. Based on that e-mail, it sounds like you are doing everything necessary and I do not have any follow up questions. Please let me know when you hear about the accelerated results or if you need to discuss further.

Thank you,

Jacob
