WEED MANAGEMENT PLAN

Noxious Weeds Present	Control Measures : Reference " <u>Guideline for Weed Management Plans</u> " booklet
(List B) Musk Thistle	Located in active areas of pit. <i>See Control Plan</i>
(List C) Common Bindweed	Scattered throughout disturbed areas of pit. <i>See Control Plan</i>
Notes / Other Required Action	Treated for Musk thistle. List B species are mandated for control under State regulations. Bindweed should be monitored in the next 2 years for further follow up treatment to contain species. Musk should be treated as needed and would be best during bindweed treatment.

Address (and location of property): Co. Rd. 343 (Pickney Rd.), Rye, CO
Parcel # 4600000249

List of Noxious Weeds and Control Plan:

Noxious Weeds Present Control Measures:

Reference "Guideline for Weed Management Plans April 2015"

State Law requires all landowners to manage noxious weed on their property. The following weeds under Colorado Noxious Weed Act, if present, are considered a threat to the economic and environmental value of our state lands. These listed under the Noxious Weed Act shall be managed under the provisions of this article. The following species under this act that have been identified in this county and should be managed in the appropriate manner as mandated throughout the term of the permit and thereafter.

"List A" species - These are rare noxious weed species that are subject to eradication upon confirmed identification during any interval of reclamation to the site. Such List A species confirmed in Fremont County may include, but are not limited to:

*Myrtle Spurge, *Japanese Knotweed, *Giant Reed, *Elongated Mustard

"List B" species - These are noxious weed species distributed throughout the State of Colorado and are subject to eradication, containment, or suppression in order to halt continued spread. Species identified within Fremont County may include, but are not limited to:

Absinth Wormwood, Black Henbane, Bouncingbet, *Bull Thistle, *Canada Thistle, Common Teasel, *Dalmatian Toadflax, Dame's Rocket, *Diffuse Knapweed, Eurasian Watermilfoil, *Hoary Cress, *Houdstongue, Hybrid Knapweed, Hybrid Toadflax, Jointed Goatgrass, *Leafy Spurge, *Musk Thistle, Oxeye Daisy, Perennial Pepperweed, *Russian Knapweed, Russian-olive, *Salt Cedar, Scentless Chamomile, Scotch Thistle, *Spotted Knapweed, *Yellow Toadflax.

"List C" species - Are well-established noxious weed species and are widespread throughout the State for which control is only recommended. Common species in Fremont County include, but are not limited to:

Chicory, Common Burdock, Common Mullein, Downy Brome, Field Bindweed, Halogeton, Johnsongrass, Perennial Sowthistle, Poison Hemlock, Puncturevine, Redstem Filaree

Identification and treatment can be conducted through Fremont County Weed Management or a recommended partnering agency. Please see Fremont County Weed Control's booklet, "Guideline for Weed Management Plans" for more details such as herbicide rates and specifics about weed control methods.

Fremont County Weed Management is operated by Qualified Licensed Applicators under the Department of Agriculture. Any management or treatment involving chemical treatment should be carried out as indicated on the label. The label is the law. Any information on management planning or about receiving cost share that is available to the public, can be discussed with the department to confirm eligibility.

*These weed species receive priority for cost share funding.

Other Required Action: The vicinity of the project area has known populations of musk thistle and common bindweed of which were treated using herbicide. Common bindweed should be monitored in the future for containment. Other species may be also relevant to the site as disturbances in soils and highway traffic may produce new noxious species. Any listed noxious weeds found on site must have the proper attention addressed as stated in the Control Plan. In the event any 'List A' or large populations of 'List B' species are observed, a site visit would be recommended during the species peak growing season to discuss management plans. Any additional questions or concerns in completing this management plan please contact Fremont County Weed Management to discuss available options.
