RE: Regular 112C Permit No. M-2019-052
Capital Sand Company LLC – Saturn X Mine Project

Dear Messrs. Cunningham, Hays and Scott:

Colorado Sand Company, LLC (CSC) submitted a Regular 112 Construction Materials Permit application on or about October 7, 2019 for the proposed Saturn X Mine Project located in Weld County, Colorado. This application was subsequently approved by the Division on January 21, 2020, as per the Division's Decision Letter – Financial and Performance Warranty Request (in the amount of \$1,198,000.00) of that date.

CSC has taken no further action with respect to the establishment of said Financial and Performance Warranty. No improvements or site disturbances have occurred on or within the Permit Area and all Saturn X Mine Project development work has ceased, as CSC has determined that moving forward with the project is inconsistent with corporate objectives.

Therefore, we respectfully request that the Division effectuate termination of, or otherwise rescind, the approved Regular 112 Construction Materials Permit No. M-2019-052, effective this date, and accordingly provide CSC written confirmation that the permit has been (voluntarily and upon request) terminated, and that the permit file status is considered by the Division to be "closed".

If there is anything further that is required to effectuate the requested termination, please so advise; I can be reached at (617) 852-0925. CSC both acknowledges and appreciates the assistance of and efforts put forth by Division staff during the application and approval process.

Sincerely,

Colorado Sand Company LLC

David Patterson, Co-President
