Re: M-1980-183 Quarterly Groundwater Monitoring Results Submission

Mr. Lennberg,

Attached is the quarterly groundwater level monitoring for Brannan Sand and Gravel Company's Pit 29 facility for 2nd Quarter 2020.

The hydrologic balance is being kept in check by the French drain, as verified by the readings from MW-4. There have not been any offsite impacts associated with hydrologic balance issues observed since the French drain was installed.

MW-1, MW-2, and MW-3 all showed increasing water levels over the quarter. Looking back at the data from Q2 in the past suggests that the raise in water level is normal for this time of year. Thus, there is nothing out of the ordinary to report.

Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Josh Oliver", with a stylized flourish at the end.
