To: Lennberg Patrick &lt;patrick.lennberg@state.co.us&gt;

Hello Patrick,

Below and attached please find documentation that I hope you find satisfactory to resolution of the problems identified on the mine.

**Mine Sign** - Sign has been placed at the entrance of the mine site - please see attached photo.

**Markers** - Survey contractor was hired to stake the boundary of the mine site, please see attached invoice from surveyor.

**Fuel Storage** - The existing fuel tank has been placed in a new secondary containment container of adequate size to prevent the potential spill of fuel on to the ground. Please see attached photo.

**Revegetation** - Weed control was hired and implemented on the site per the approved weed control plan. This will be revisited on an annual basis and implemented as needed to control noxious weed. Please see attached receipt from The Weed Works for the work completed.

I hope this satisfies the issues, please let me know if you have any further questions or concerns.

Thanks,

- Nick

Good Afternoon Nick,

Please find attached to this email a copy of the Division's extension approval letter for the problems cited in the May 2020 inspection report. The new due date for problem resolution is August 10, 2020.

A hard copy will not be mailed unless you specifically request it.

I was out in the field earlier this week and have not had a chance to recalculate the bond according to your proposed reclamation plan edits but should have a good idea by early next week.

If you have any questions please let me know.

Thank you,  
Patrick

Hello Patrick,

I hope you are well. As we spoke, I would like to request a 30 day extension on the items needing corrective action. Unfortunately with the pandemic getting some of these completed is proving challenging. I believe 30-days will be sufficient as I have all elements planned for completion, just need a little more time to execute.

Thanks,

----

Nick Simpson
