RE: Deep Creek Placer, Permit No. M-1986-102, Inspection Problem Abated

Dear Mr. Collins:

On June 11, 2020 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. A problem was cited during the inspection for excessive trash, debris and other items located on the mine site as well as one of the portals having stability concerns. Corrective actions called for a major site cleanup and organization and removal of the debris as well as addressing the portal concerns.

On July 31, 2020 the Division received documentation demonstrating compliance with the major site cleanup, as well as more details regarding the portal issue. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me at the Division of Reclamation, Mining and Safety, 1313 Sherman St., Room 215, Denver, CO 80203, by phone at (303) 866-3567 Ext. 8187 or by email at lucas.west@state.co.us.

Sincerely,

Lucas West
Environmental Protection Specialist
Division of Reclamation, Mining and Safety
