#### The following inspection topics were identified as having Problems or Possible Violations. OPERATORS SHOULD READ THE FOLLOWING PAGES CAREFULLY IN ORDER TO ASSURE COMPLIANCE WITH THE TERMS OF THE PERMIT AND APPLICABLE RULES AND REGULATIONS. If a Possible Violation is indicated, you will be notified under separate cover as to when the Mined Land Reclamation Board will consider possible enforcement action.

#### **GENERAL INSPECTION TOPICS**

This list identifies the environmental and permit parameters inspected

### **PROBLEMS/POSSIBLE VIOLATIONS**

**INSPECTION TOPIC:** Gen. Compliance With Mine Plan

**PROBLEM:** The current mine plan needs to be updated and clarified pursuant to C.R.S. 34-32.5-112 (1)(c)(VI). The operator must provide sufficient information to describe or identify how the operator intends to conduct the operation.

**CORRECTIVE ACTIONS:** The operator shall post additional bond of \$1,867 <u>or</u> submit a Technical Revision, with the required \$216 revision fee, to update and clarify the current approved mine plan to reflect existing and proposed activities by the corrective action date.

**CORRECTIVE ACTION DUE DATE:** September 28, 2020

**INSPECTION TOPIC:** Revegetation

**PROBLEM/POSSIBLE VIOLATION:** Problem: There are state-listed noxious weeds present on site and there is not a weed control plan in the permit as required by Section 3.1.10 (6) of the Rules.

**CORRECTIVE ACTIONS:** The operator shall develop a weed control and management plan in accordance with Section 3.1.10 (6) of the Rule. This plan should be developed in consultation with the county extension agency, or weed control district office and should include specific control measures to be applied, a schedule for when control measures will be applied and a post-treatment monitoring plan. This weed control plan shall be submitted to the Division as a Technical Revision to the approved plan with the appropriate Technical Revision fee of \$216.00 by the corrective action date.

**CORRECTIVE ACTION DUE DATE:** September 28, 2020

#### **OBSERVATIONS**

This inspection was conducted by Brock Bowles of the Division of Reclamation, Mining and Safety (Division). Greg Larson (Operator) was present for the inspection. The Larson Pit is located about 7 miles south of Haxtun, Colorado. The site is an active 112c operation with 68 acres permitted and the post-mining land use is rangeland. At the time of the inspection it was warm, partly cloudy and the ground was dry.

No mining activity was being conducted and no equipment was on site. The mine identification sign was in place and was legible. The permit boundary was marked with a fence on all sides. The gate was closed upon arrival and cattle were grazing in the permit area.

No standing water was seen in the pit or in the creek bottom. No obstruction were seen in the creek bottom that would interfere with water flow, if water were to begin flowing.

There are musk thistle plants in Area 1 that need to be treated. Musk thistle is a List B Colorado noxious weed and needs to be treated. The operator has submitted photos documenting that the musk thistles have been mowed since this inspection was conducted. The current mining permit does not have a weed control plan. The operator needs to submit a weed control plan through a technical revision for inclusion into the permit as required by Section 3.1.10 (6) of the Rules. A single technical revision can be submitted for both of the issues listed in this report.

The current reclamation plan is divided into 3 distinct areas. At this time, the Division holds a bond for \$28,889 to cover the reclamation for Area 2. Areas 1 and 3 are not currently bonded. It was noted in the March 2019

inspection report that mining had taken place in Area 1 and the bond had not been adjusted to cover the additional disturbance. An estimate was calculated for \$31,911 to cover the reclamation for the entire 33 acres of Area 1. When Mr. Larson was notified of the discrepancy he ceased mining in the area, backfilled and graded, and reseeded the area. The additional bond was not posted by the operator.

The size of the disturbance created in Area 1 is about 3.5 acres. The Division recognizes that the operator ceased mining Area 1, backfilled and graded the area and seeded it: however, this area was disturbed by mining activities and is not adequately bonded as required by Rule 4.2.1. Additional bond needs to be posted for \$1,867 to cover the cost of revegetation for the 3.5 acres <u>or</u> the operator needs to submit a technical revision, with the required \$216 revision fee, to update the current mine plan to reduce the overall liability of the mine's reclamation plan. The posting of the additional bond for the disturbance in Area 1 only covers the cost of revegetation for the 3.5 acres and should not be interpreted as permission to create additional disturbance in Area 1.

#### PERMIT #: M-2007-012 INSPECTOR'S INITIALS: BFB INSPECTION DATE: July 15, 2020
