

TRAPPER MINING INC.

P.O. Box 187 Craig, Colorado 81626 (970) 824-4401

July 24, 2020

Colorado Department of Public Health and Environment Water Quality Control Division WQCD-P-B2 4300 Cherry Creek Dr. South Denver, CO 80246-1530

Subject: Second Quarter 2020 Colorado Wastewater Discharge Monitoring Reports

Permit No. CO-0032115

To Whom It May Concern:

Enclosed are Trapper Mine's Second Quarter 2020 Colorado Wastewater Discharge Monitoring Reports for the period 04/1/20-06/30/20. During this quarter, four NPDES outfalls were active. Outfalls 001, 002 and 011 discharged routinely throughout the quarter. Outfall 020 discharged in response to spring snowmelt occurring in early April. Outfalls 008, 009, 017, 018, 019, 021, 022, 023 and 024 did not discharge during the quarter. Values reported on the enclosed DMRs represent the maximum (or minimum as applicable) monthly/daily values generated at each outfall during the quarter.

The TDS is reportable on a quarterly basis per our permit. The TDS values are as follows for each active outfall:

001	002	011	020
3980 mg/L	1580 mg/L	1640 mg/L	904 mg/L

Also enclosed are monthly NOAA weather summaries for the reporting period. The enclosed NOAA weather summary reports show the temperatures and precipitation measurements for the period mentioned. Daily precipitation measurements are recorded at 7:00 a.m. as well as daily maximum and minimum temperatures from the previous 24 hours.

No exceedences of primary effluent limitations occurred at any outfall during the quarter.

Trapper is required to maintain sediment levels in ponds at or below 60% of the pond volume. All outfalls have been properly maintained.

If you have any further questions or comments concerning the enclosed information, feel free to contact me.

Sincerely,

ELECTRONICALLY SUBMITTED AND SIGNED THROUGH NetDMR

Graham Roberts Environmental Engineer
