Re: Daniels Sand Pit 2, Permit No. M-1973-007-SG;
Seventh Decision Date Extension Request Acknowledgment, Technical Revision (TR-09)

Dear Mr. Deuto:

On August 7, 2020, the Division of Reclamation, Mining and Safety (DRMS) received via email your request to extend the decision date for Technical Revision (TR-09) 60 days from the July 2, 2020 submittal from Lithos Engineering for which the DRMS had no documentation from Aggregate Industries (AI) authorizing Lithos to submit responses on AI's behalf. The DRMS accepts this request as a continuation of the waiver to the 30-day review period for technical revisions pursuant to Rule 1.9.1. and extending the decision date to August 31, 2020.

Your letter also provided authorization from AI to accept the July 2, 2020 submittal from Lithos. As such, the DRMS will begin the review of the aforementioned submittal.

If you have any questions, you may contact me at (303)866-8567 x8169.

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist III
