RE: P-2013-002 and P-2020-002 Zephyr Gold USA Ltd
2020 Exploration Plan Proposed Adjustment
Twinning Exploration Hole GC-44

Dear Mr. Cazier and Ms. Carter,

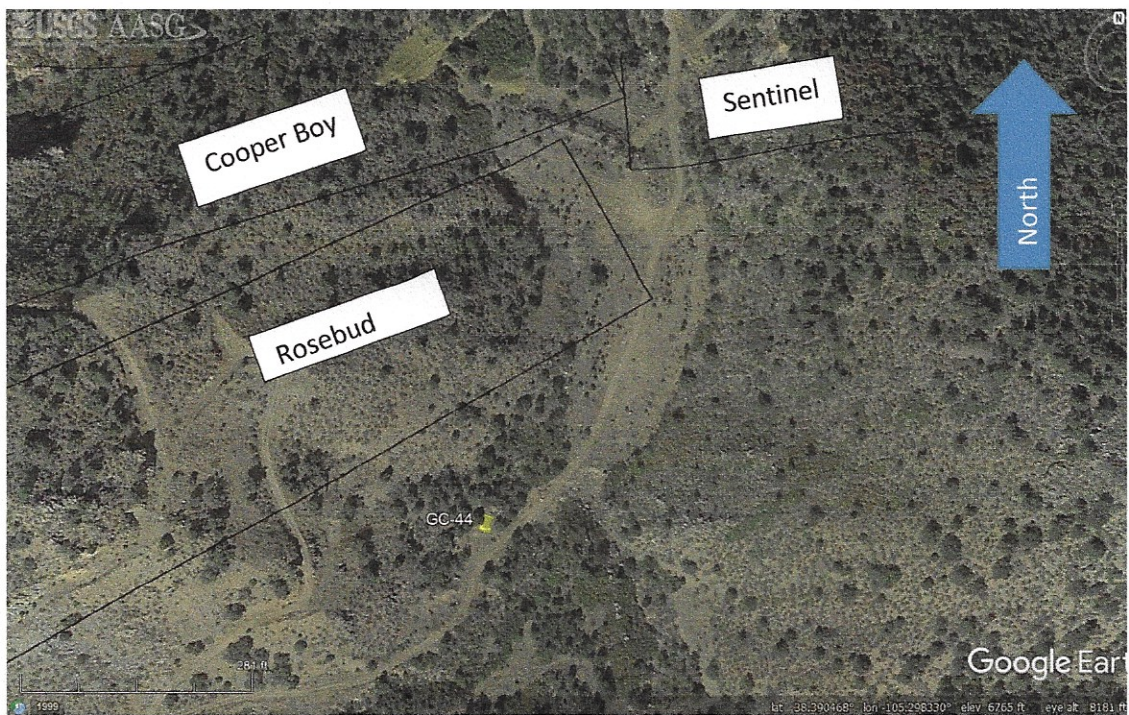

Zephyr needs to twin the historic exploration drill hole GC-44 in the Dawson area to provide critical information for this portion of the gold resource. Key sections of drill core of this historic drill hole have been badly cannibalized over the decades. As such, it is planned that GC-44 will be twinned from an existing drill pad on the existing mountain trail, thus not requiring a drill pad or access road to be constructed. Please refer to the aerial figure below. It is our understanding that the posted and approved state-wide bond allows for up to 20 exploration holes.

I trust this meets with your approval. Please do not hesitate to contact me if you have any questions.

Feel free to contact me directly with any questions at (719) 275-8951 or angela@envalternatives.com.

Respectfully submitted,

Angela M. Bellantonui

Please accept the attached as notification of a modification to the 2020 Drill Season.

To date, only one site has been explored with one hole in the El Plomo area.

Please feel free to contact me with any questions.
