**RE: Twentymile Coal LLC - Foidel Creek Mine (Permit No. C-82-056), Technical Revision
(TR20-94) Coal Refuse Disposal Area (CRDA) Modification**

Dear Ms. Lynch,

Twentymile Coal (TC) requests CDRMS approval of a Technical Revision to our existing Permit for modification of the Coal Refuse Disposal Area (CRDA). The current foot print and structural design of the refuse pile will remain the same. Due to surveying errors following the second lift of the refuse pile the lifts have shifted and rotated from the original design. The lifts still comply with the engineering aspects as far as the lift dimensions, face slopes, and drainage.

This submittal includes a revised exhibit which presents the current status of the CRDA with the current lift's rotation. This submittal also includes a revision application form, revised text, and an additional Slope Stability Analysis which confirms that the stability of current and future slopes will not be affected. This revision should cause no increase or decrease in the bond amount and therefore no bond estimate is necessary.

We appreciate your consideration and cooperation in facilitating timely review and approval. Once you have had opportunity to review the accompanying information, please feel free to contact me with any questions or to discuss related matters.

Sincerely,

Miranda Kawcak
