2020 Moores Mining, LLC Annual Report

Mining in 2019 and 2020 has continued at a steady pace. Covid-19 has slowed the pace somewhat, but has still been steady most of the year. Work has been done in the southwest side of the pit to increase the water quality storage area in preparation to move to the west when the southeast end is mined out. At present time it is not anticipated to open any new ground in the next year, at the present rate of mining. Some area was planted in the winter and spring of 2020 and due to the extreme drought this year will probably need to be replanted, if conditions get favorable.
