Regarding: Annual Report

Permittee: Whitewater Building Materials Corp.
Permit #: M-2009-048
Operation Name: Gunnison River Gravel Pit
Anniversary Date: September 28, 2020

The above referenced pit location was in operation more than 180 days and has not been granted a temporary cessation during the past year.

During the past year extraction was completed in Pit 1. Pit 1 is now entirely mined and has been re-sloped. Seeding of Pit 1 is scheduled for the fall of 2020.

Operations and stockpiles in Pit 5 are ongoing.

Weed control was performed from April thru August. Primarily 2-4-D and curtail are used to control mostly Kosha weeds and some Russian Knapweed as well as mowing operations.

Attached are two maps of the pits showing the extraction areas, sloping and stockpile locations.

Sincerely

Mark Gardner VP
Whitewater Building Materials Corp.
