Re: Application by Peak Ranch Resource (File No. M2020041)

To whom it may concern:  
I am asking for Aggrieved Party status on this application.

**We oppose this permit** because it will cause great harm to a protected wilderness which we value highly. The area around this proposed quarry is federally and county protected open space. In addition, many ranches have created conservation easements to protect this landscape. The purpose of these protections is to keep exactly this sort of industrial use from occurring.

Any industrial activity in this area is completely contrary to the natural, rural and economic values of the valley. The quarry and associated extremely heavy truck traffic would be dangerous and harming to the communities in the Blue River Valley. The proposed reclamation plan is wholly inadequate for this wilderness area.

**The community, the wildlife, the fishery and all who use and value this wilderness area all require that you do not approve this application.**

Yours sincerely,  
Margaret Nelson & David Krischer
