Thank you Barbra, I appreciate the information. This sounds like a very interesting project and appears to be outside our jurisdiction but I do have a couple of questions. After review of the information from the Argo Mine website, City of Idaho Springs website and the CGS comment letter it appears the activity Mr. Fowler is concerned about pertains to the development of the Mighty Argo and Virginia Canyon Mountain Park Mixed-Use Development. Specifically, for the areas near the Virginia Canyon Road and the Santa Fe Mine Road appears to be proposed as a landing area for the proposed Gondola, correct? Will any material (rock, fill dirt, historic tailings, etc.) be excavated, sold or hauled off-site using public roads?

Jared
