RE: C Road Pit, File No. M-2016-050 , Technical Revision (TR-1) Adequacy Review

Dear Mr. Doody:

The Division of Reclamation, Mining and Safety (Division) is in the process of reviewing the above referenced Technical Revision in order to ensure that it adequately satisfies the requirements of the Colorado Land Reclamation Act (Act) and the associated Mineral Rules and Regulations for the Extraction of Construction Materials (Rules). During review of the material submitted, the Division determined that the following issue(s) of concern need to be adequately addressed before the Technical Revision can be considered for approval. Please provide the following:

1. The narrative states that the acreages associated with Phase 2 and 3 are changing. However the map shows Phases 2, 3 and 4 changing as well as the total mined acres. Please clarify the number of acres to be included under each phase as well as the total affected land. Note that areas used for topsoil/overburden storage are still considered affected lands.

Please submit your response(s) to the above listed issue(s) by Monday, October 19, 2020 in order to allow the Division sufficient time for review. A decision due date of **October 30, 2020** has been set. The Division will continue to review your Technical Revision and will contact you if additional information is needed.

If you require additional information, or have questions or concerns, please feel free to contact me

Sincerely,

Amy Yeldell
