October 2, 2020

Tim Cazier, P.E. CO Division of Reclamation Mining and Safety 1313 Sherman Street, Room 215 Denver, CO 80203

RE: Coaldale Quarry, Permit No. M-1977-247 Response to Second Adequacy Review Amendment 3

Dear Mr. Cazier,

Please accept this correspondence on behalf of Jr. Julio Villon of Holcim (US) Inc. for the above referenced application adequacy review.

6.4.3 Exhibit C – Pre-mining & Mining Plan Maps; Exhibit C-1 Vegetation: Please find the enclosed site figure showing present vegetation based on soil types in the proposed permit boundary.

6.4.5 Exhibit E – Reclamation Plan: Please find a revised Exhibit E that addresses the questions listed in the Division's correspondence. The USDA/NRCS wildlife habitat seed mix and the Fremont County Weed Management Plan is included in the exhibit. In addition, please find a revised Exhibit L – Reclamation Cost Estimate.

6.1.6 Exhibit F – Reclamation Plan Map: Exhibit F now includes figures F2A, F2B, F3A and F3B that present cross-sections that depict the three reclamation techniques.

6.4.6 Exhibit G – Water Information: The well (Permit No. 34131-F-R) is within the permit boundary and is located on Exhibit C. Mining requires an average of approximately 15,000 gallons per day of water. The site operates under NPDES Permit COG501012

6.4.7 Exhibit M – Other Permits: Fremont County requires an application for a major modification to the current Conditional Use Permit. The application will be submitted in a timely fashion following the Division's approval of this amendment application.

6.4.19 Exhibit S – Permanent Man-made Structures: The executed structure agreement with Black Hills Energy is provided herein. The water tanks and sizes are provided on Exhibit C.

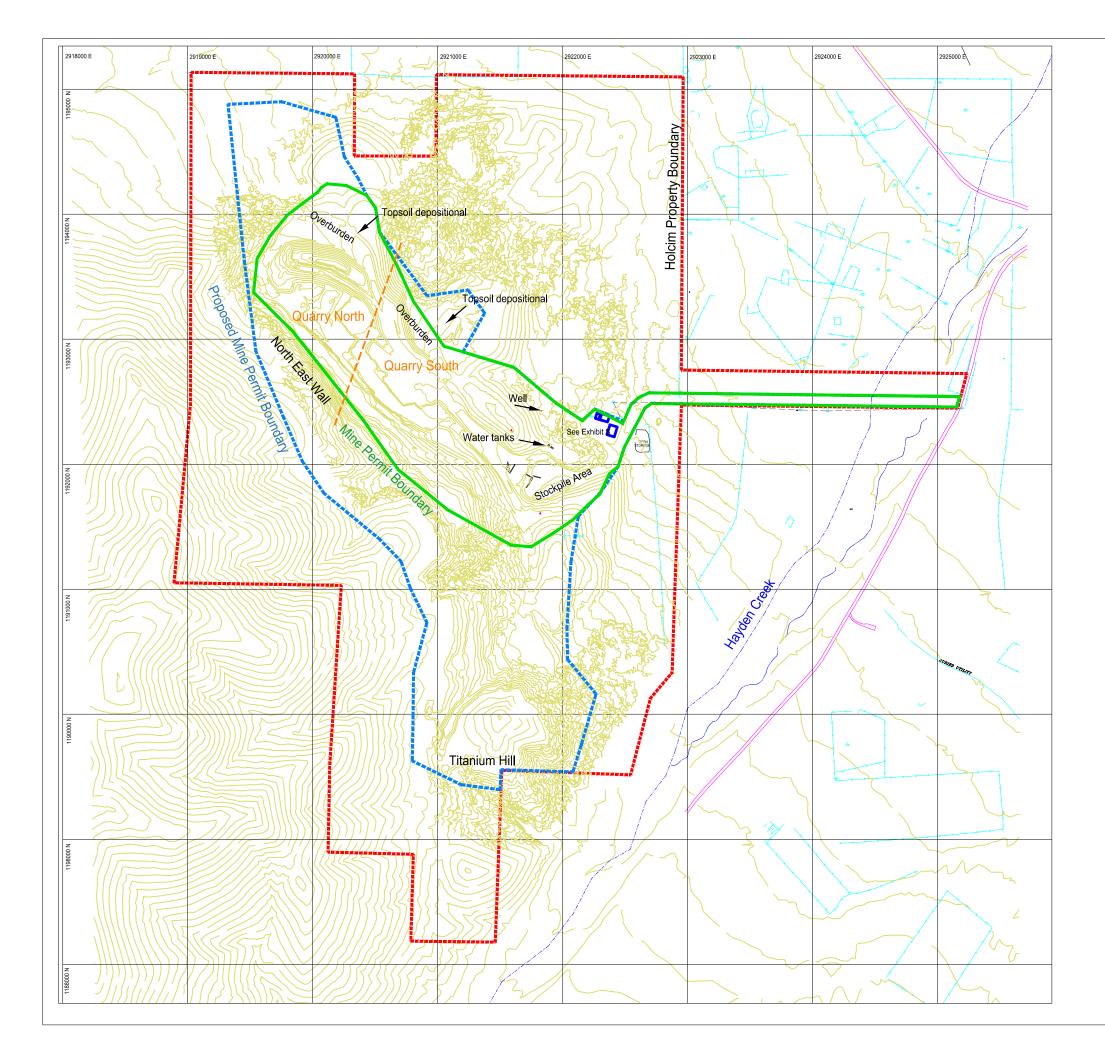

Proof of notification to land owners within 200 ft. is included herein as well as proof of filing this correspondence with Fremont County Clerk and Recorder.

Please feel free to contact me directly with any questions at 719-275-8951 or email angela@envalternatives.com.

Respectfully submitted

Mahon hugh Angela M. Bellantoni Ph.D.

Cc: Julio Villon

6.4.5 Exhibit E Reclamation Plan

Post-mining land use will be wildlife habitat. This reclamation plan is to clarify and in addition to the DRMS approved plan for the existing permitted area (81.79 acres). Wildlife habitat is suitable for this mine site due to final topography as well as recommended NRCS revegetation seed mix. The sloped benches and shaped waste piles will provide a man-made hogback of sorts for wildlife to climb and roam.

Three distinct techniques will be implemented to reclaim the benches, the stockpiles and the mine floor. The lowest three benches, approximately 90 ft., will be backfilled with waste rock to a final mine floor elevation of 6,790 ft. (Figure Exhibit F-2B Cross-sections A). The horizontal surface of the remaining benches will be sloped 3H:1V from the edge of the bench back to the highwall. Any remaining stockpiles of waste rock will be sloped to 3H:1V.

Backfilling the mine floor will utilize two dump trucks, a loader, a bulldozer and a water truck. The waste rock and/or overburden will be loaded into the dump trucks, transported and placed to the mine floor backfilling area. The bulldozer will distribute the backfill material and, working with the water truck, will compact the material.

The horizontal surface of the remaining benches, primarily on the west side of the main mine area, will be sloped 3H:1V from the edge of the bench back toward the high wall (Figure Exhibit F-2B Cross-sections A). Waste rock will be used to rebuild the slope using the same equipment to backfill the main mine floor.

After the main mine floor is backfilled and the bench slopes are reconstructed, the remaining stockpiles of waste rock will be sloped. Using a bulldozer, the stockpiles will be contoured to slopes no steeper than 3H:1V (Figure Exhibit F-3B Cross-sections C).

Topsoil will be distributed over all backfilled and contoured surfaces to a depth ranging from four to six inches. The topsoil will be loaded into dump trucks with a loader and distributed as described above. The seedbed will be prepared as directed on the USDA worksheet provided on the following page.

While distributing the topsoil, erosion furrows will be contoured into the bench slopes to mitigate erosion. The furrows will be contoured parallel to the edge of the bench and approximately midway between the edge of the bench to the highwall. Erosion furrows are preferred to straw waddles since they can remain after reclamation vegetation takes hold. This increases precipitation infiltration time for the new and ultimately established vegetation.

Stockpiled topsoil will be appropriately posted and segregated for use in reclamation. In the event the topsoil cannot be replaced on backfill within one year, the stockpiles will be broadcast seeded with a temporary seed mix or chemically stabilized.

Seeding will occur either in the fall or spring with the seed mix presented on the following page. Seed will be broadcast at the rate of 24.54 pounds per acre, mulched with certified weed free straw, two tons per acre, and tracked into place with a dozer. Fertilizer was not recommended by Soil Conservation District.

Fremont County Weed Control Officer, Brittany Pierce, visited the site on September 28, 2020. The inspection report and Weed Management Plan is provided herein. Weeds will be managed as directed by Ms. Pierce in accordance with the Fremont County Weed Management Plan Guide.

Integrated Weed Management Plan

Project Name: Coaldale Quarry DATE 09/28/2020

Address (or location of property): Assessor Map # 3951320000011, County Road 6, Coaldale, CO 81222

List of Noxious Weeds and Control Plan:

Noxious Weeds Present Control Measures: Reference "Guideline for Weed Management Plans April 2015" State Law requires all landowners to manage noxious weed on their property. The following weeds under Colorado Noxious Weed Act, if present, are considered a threat to the economic and environmental value of our state lands. These listed under the Noxious Weed Act shall be managed under the provisions of this article. The following species under this act that have been identified in this county and should be managed in the appropriate manner as mandated throughout the term of the permit and thereafter. "List A" species - These are rare noxious weed species that are subject to eradication upon confirmed identification during any interval of reclamation to the site. Such List A species confirmed in Fremont County may include, but are not limited to: *Myrtle Spurge, *Japanese Knotweed, *Giant Reed, *Elongated Mustard "List B" species - These are noxious weed species distributed throughout the State of Colorado and are subject to eradication, containment, or suppression in order to halt continued spread. Species identified within Fremont County may include, but are not limited to: Absinth Wormwood, Black Henbane, Bouncingbet, *Bull Thistle, *Canada Thistle, Common Teasel, *Dalmatian Toadflax, Dame's Rocket, *Diffuse Knapweed, Eurasian Watermilfoil, *Hoary Cress, *Houdstongue, Hybrid Knapweed, Hybrid Toadflax, Jointed Goatgrass, *Leafy Spurge, *Musk Thistle, Oxeye Daisy, Perennial Pepperweed, *Russian Knapweed, Russian-olive, *Salt Cedar, Scentless Chamomile, Scotch Thistle, *Spotted Knapweed, *Yellow Toadflax. "List C" species - Are well-established noxious weed species and are widespread throughout the State for which control is only recommended. Common species in Fremont County include, but are not limited to: Chicory, Common Burdock, Common Mullein, Downy Brome, Field Bindweed, Halogeton, Johnsongrass, Perennial Sowthistle, Poison Hemlock, Puncturevine, Redstem Filaree

Identification and treatment can be conducted through Fremont County Weed Management or a recommended partnering agency. Please see Fremont County Weed Control's booklet, "Guideline for Weed Management Plans" for more details such as herbicide rates and specifics about weed control methods.

Fremont County Weed Management is operated by Qualified Licensed Applicators under the Department of Agriculture. Any management or treatment involving chemical treatment should be carried out as indicated on the label. The label is the law. Any information on management planning or about receiving cost share that is available to the public, can be discussed with the department to confirm eligibility.

*These weed species receive priority for cost share funding.

Other Required Action: The vicinity of the proposed planning area is a known location for noxious weed infestations of Myrtle Spurge (List A) and Canada thistle (List B). Species found on premises observed common mullein (List C) in small populations. Other noxious species could present themselves on site during any point of time and should also be addressed as stated in the Control Plan. In the event any 'List A' or large populations of 'List B' species are observed, a site visit would be recommended during peak growing season to discuss further management plans. In order to do this, please consider all factors in choosing a time (such as weather, presence of actively growing plants, and operation plans or activities). Any additional questions or concerns in completing this management plan please contact Fremont County Weed Management to discuss available options. (719-276-7317)

Holcim (US) Inc. and Black Hills Colorado Electric, LLC

Structure Agreement

This letter has been provided to you as the owner of a structure on or within two hundred (200) feet of a proposed mine site. The State of Colorado, Division of Reclamation, Mining and Safety ("Division") requires that where a mining operation will adversely affect the stability of any significant, valuable and permanent man-made structure located within two hundred (200) feet of the affected land, the Applicant shall either:

- a) Provide a notarized agreement between the Applicant and the Person(s) having an interest in the structure, that the Applicant is to provide compensation for any damage to the structure; or
- b) Where such an agreement cannot be reached, the Applicant shall provide an appropriate engineering evaluation that demonstrates that such structure shall not be damaged by activities occurring at the mining operation; or
- c) Where such structure is a utility, the Applicant may supply a notarized letter, on utility letterhead, from the owner(s) of the utility that the mining and reclamation activities, as proposed, will have "no negative effect" on their utility. (*Construction Materials Rule 6.3.12 and Rule 6.4.19 & Hard Rock/Metal Mining Rule 6.3.12 and Rule 6.4.20*)

The Colorado Mined Land Reclamation Board ("Board") has determined that this form, if properly executed, represents an agreement that complies with Construction Materials Rule 6.3.12(a), Rule 6.4.19(a), and C.R.S. § 34-32.5-115(4)(e) and with Hard Rock/Metal Mining Rule 6.3.12(a), Rule 6.4.20(a), and C.R.S. § 34-32-115(4)(d). This form is for the sole purpose of ensuring compliance with the Rules and Regulations and shall not make the Board or Division a necessary party to any private civil lawsuit to enforce the terms of the agreement or create any enforcement obligations in the Board or the Division.

The following structures are located on or within 200 feet of the proposed affected area:

Overhead power line structures 1-4 as shown on attached exhibit which, by this

| • | |
|---|--|
| | reference, is fully incorporate herein. |
| | |
| | |
| | |
| | (Please list additional structures on a separate page) |

CERTIFICATION

| The Applicant, Holcim (US) Inc. | (print applican | t/company name), |
|---|--|--------------------|
| | ative's name), as Plant Manager | (print |
| representative's title), does hereby certify that | | ture owner) shall |
| be compensated for any damage from the prop | osed mining operation to the above listed | structure(s) |
| located on or within 200 feet of the proposed a | ffected area described within Exhibit A, o | of the Reclamation |
| Permit Application for Coaldale Quarry | (or | peration name), |
| File Number M-1977-247 | 2 | |

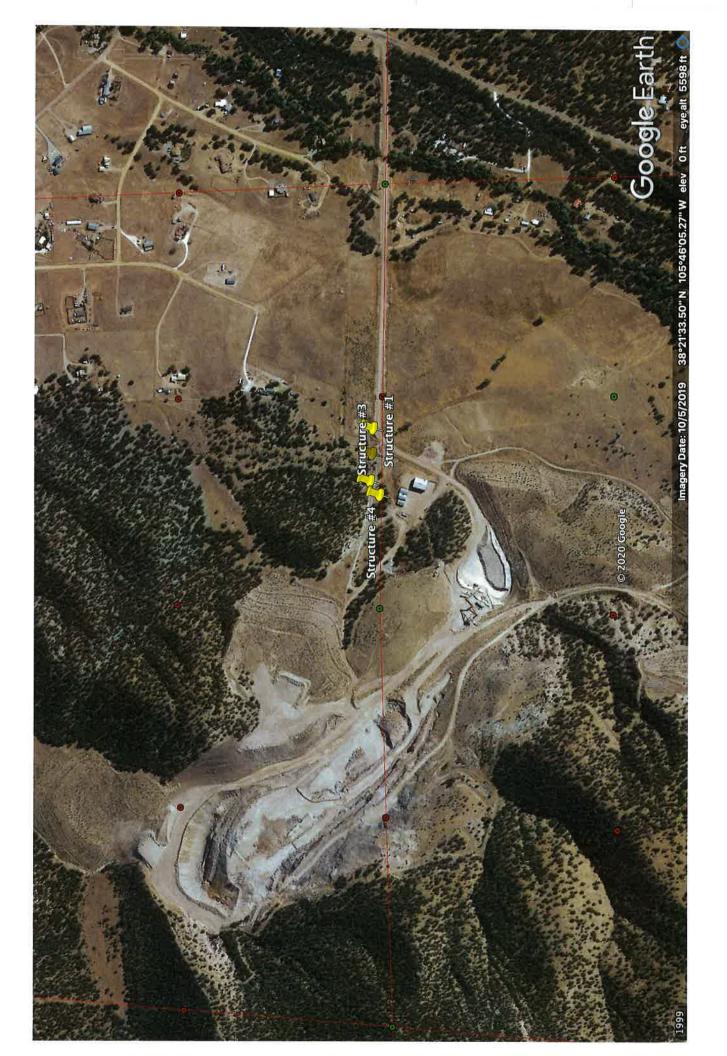

This form has been approved by the Colorado Mined Land Reclamation Board pursuant to its authority under the Colorado Land Reclamation Act for the Extraction of Construction Materials and the Colorado Mined Land Reclamation Act for Hard Rock, Metal, and Designated Mining Operations. Any alteration or modification to this form shall result in voiding this form.
