**RE: Mill Reactivation Request
Leadville Mill-Lake County
Permit M-1990-057**

Dear Dustin,

The Leadville Mill and Union Milling Company requests the Colorado Division of Reclamation Mining Safety, activate permit M-1990-057. The mill was placed in temporary cessation on January 5, 2018. During temporary cessation, Union Milling continued to comply with the Rules and Act, including maintaining the site and continued to file an annual report and annual fee.

On behalf of Union Milling Company, we request permit activation as soon as possible, in order to complete previously approved site activities before the onset of winter.

The Division's and your approval and support is greatly appreciated.

Respectively submitted

George M.L. Robinson
Union Milling -Authorized Representative
